EXPLORING AND SHAPING

INTERNATIONAL
FUTURES

PRAISE FOR *EXPLORING AND SHAPING INTERNATIONAL FUTURES*

“This is an essential guide to understanding current trends and to mapping the future. Only the integration of economic, social, and environmental trends can give us a sufficient understanding of each.”

—**PETER JOHNSTON**, European Commission and the Club of Rome

“This large-scale integrated global simulation modeling system is a user-friendly, professional tool for long-term policy analysis and education.”

—**PENTTI MALASKA**, Professor Emeritus, Turku School of Economics and Business Administration, Honorary Member of the Club of Rome

“No other text covers the major transformations shaping the global future with as strong an empirical base and with as much room for students and others to determine for themselves which of these are problems, which are solutions, and what should be done with them to improve our joint future.”

—**PETER C. BISHOP**, Ph.D, Founding Member, Association of Professional Futurists

“Together the text and the IFs computer model offer a fascinating compendium of theories, data, and formal modeling. The new book provides a wonderful learning environment as well as a valued test bed for debate about practical policy.”

—**SAM COLE**, Professor, University at Buffalo, former North American editor, *Futures*

“This is truly a book for a new millennium. It allows the reader to explore future global issues and to investigate the impact of possible policy changes.”

—**DENNIS PIRAGES**, Harrison Professor of International Environmental Politics at the University of Maryland, Board Member of the World Future Society

BARRY B. HUGHES is Professor of International Relations in the Graduate School of International Studies at the University of Denver.

EVAN E. HILLEBRAND is Visiting Professor in the Patterson School of Diplomacy at the University of Kentucky and a Senior Economist for the Central Intelligence Agency.
